

Ceiling fan

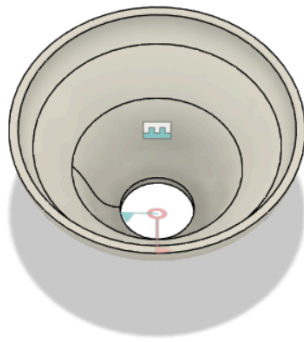

T

Base component

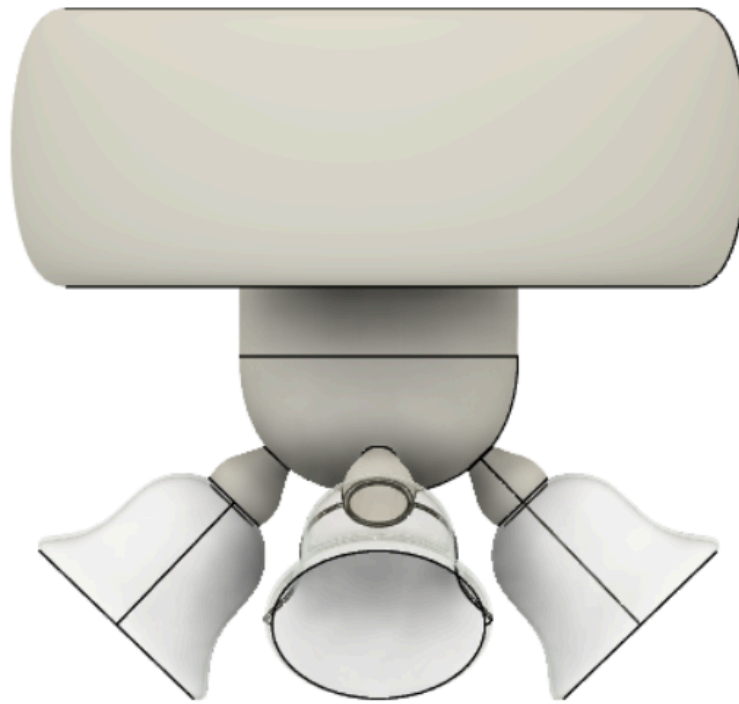

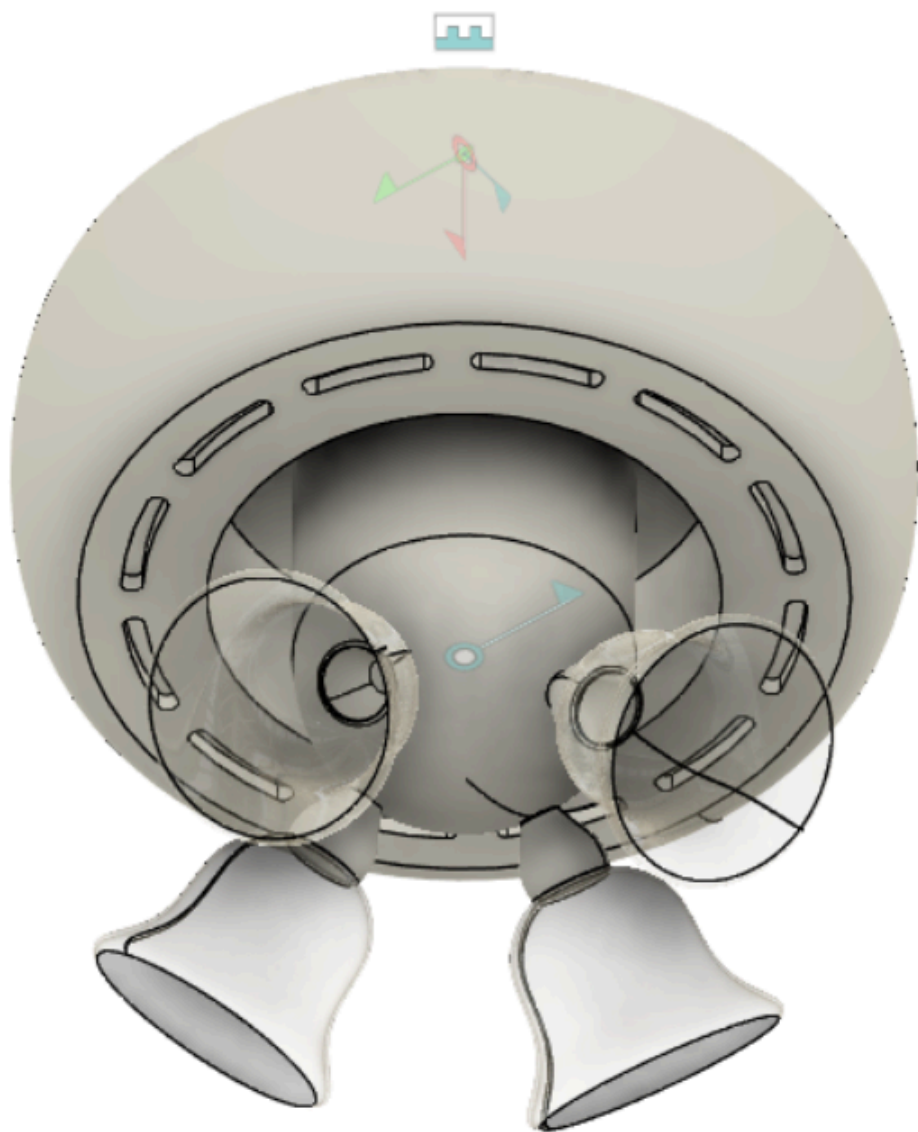

Rod and ball component

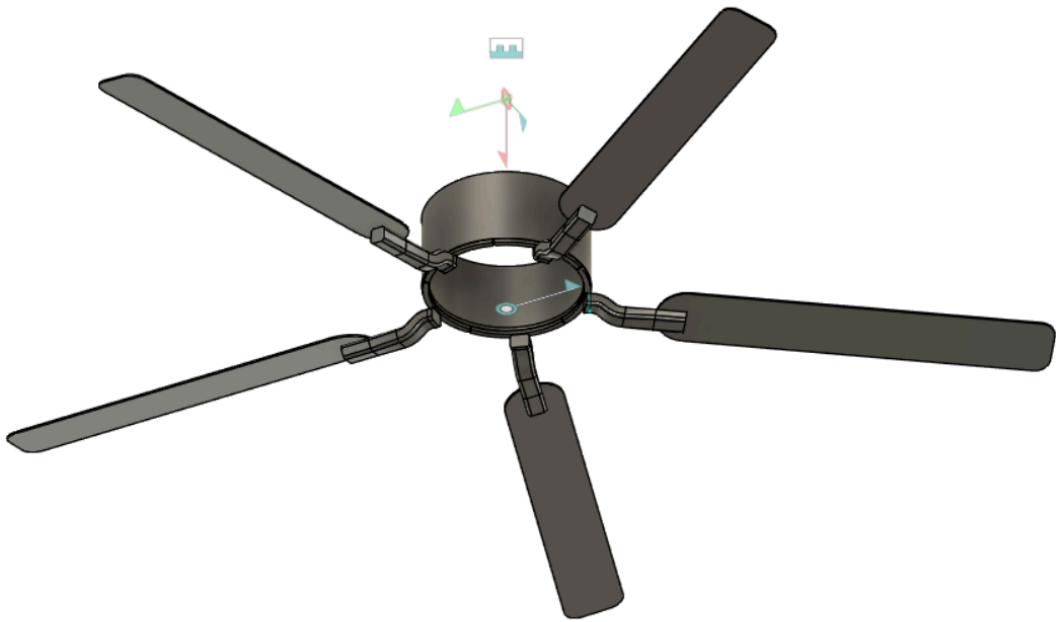

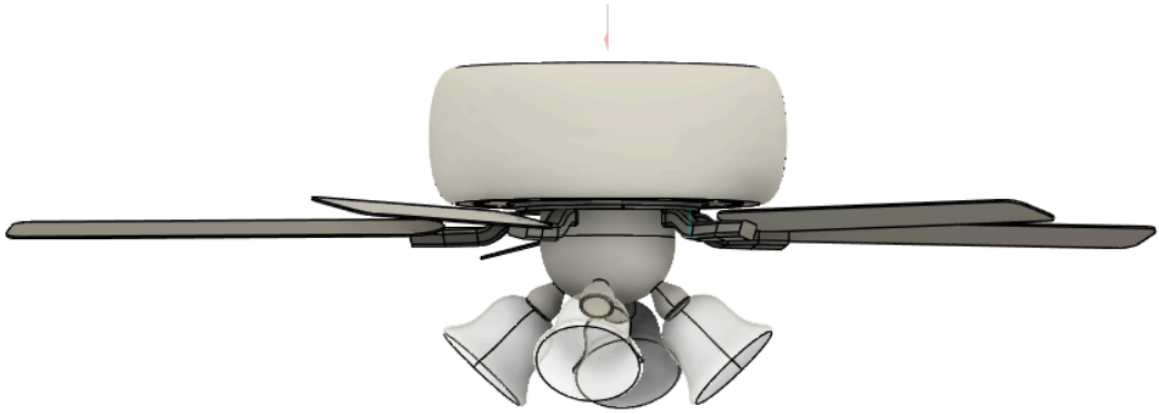

Main Body

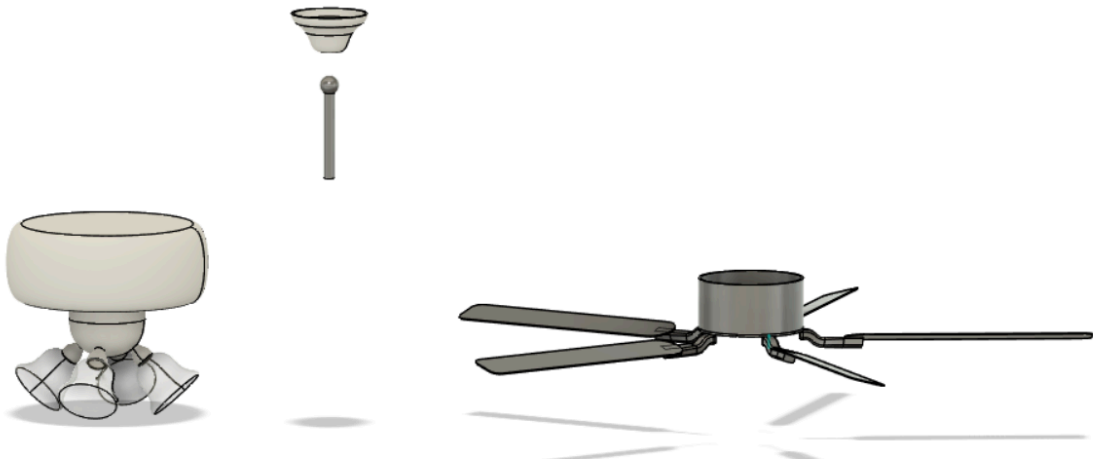

Blades

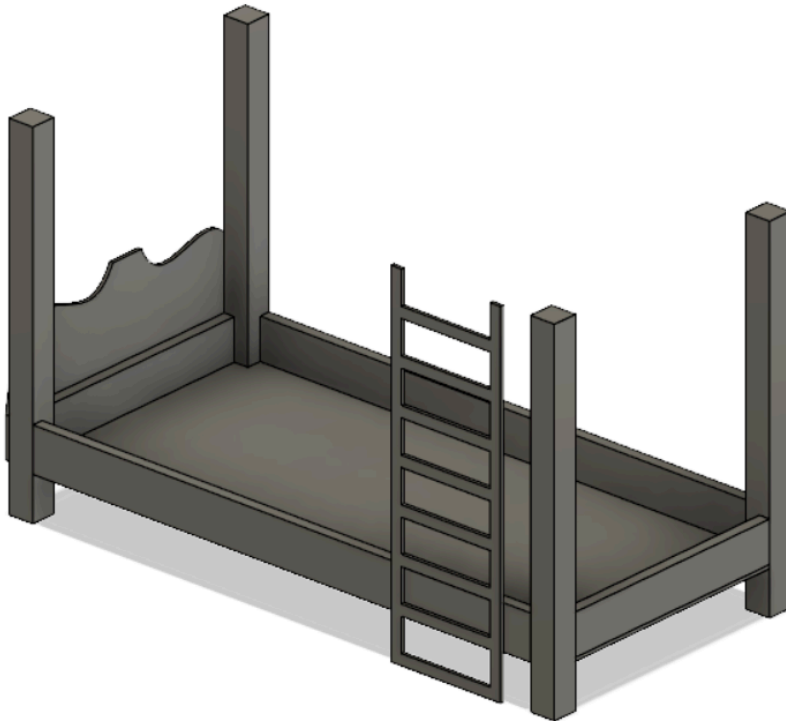

Exploded view (Animation environment)

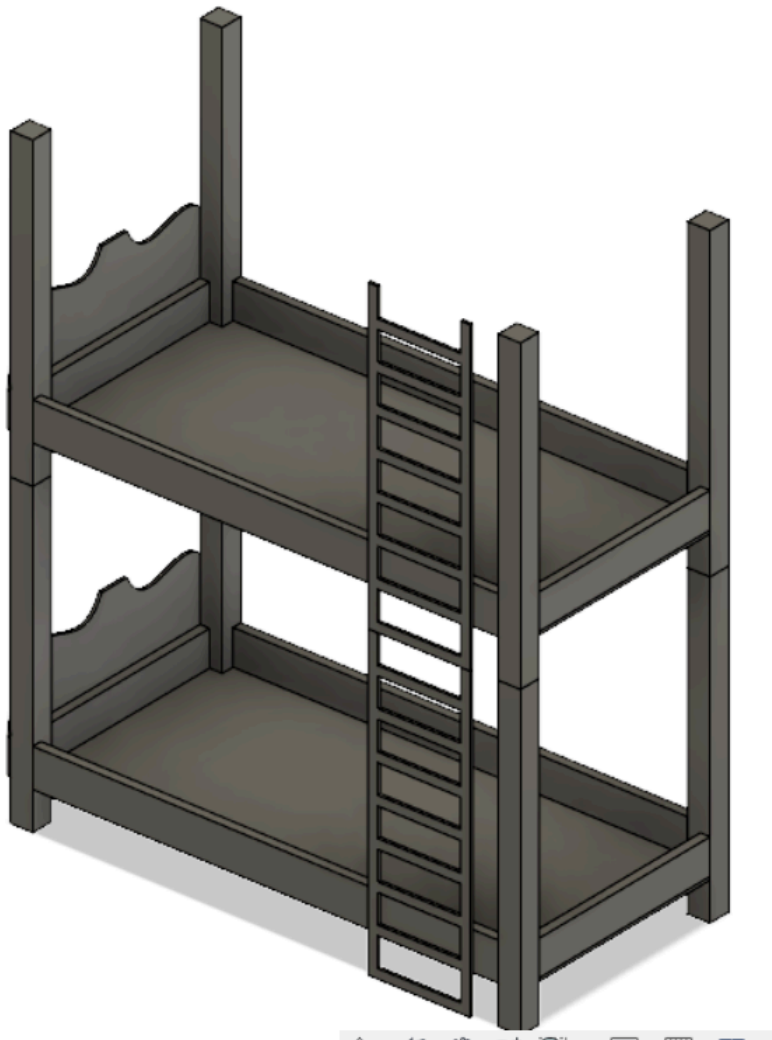

Bunkbeds

I had a parameter called “numBeds” that controlled how many beds were stacked on top of each other. By just changing the parameter, the number of beds changed. Below are some examples.

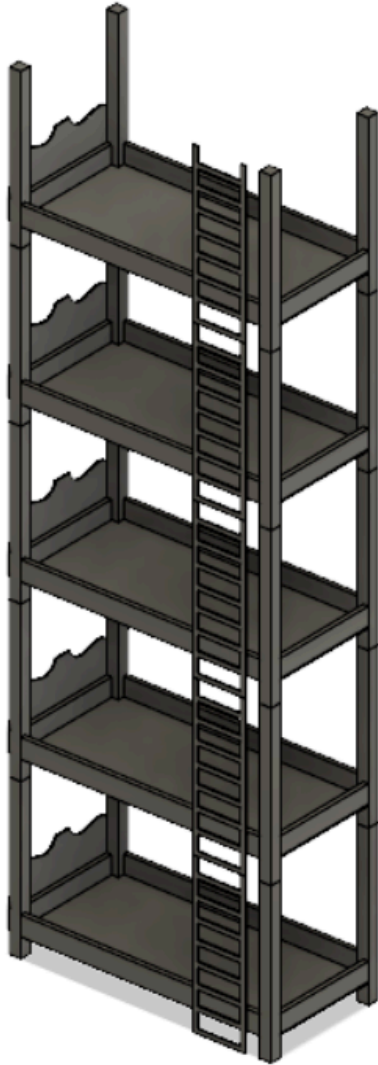

numBeds=1

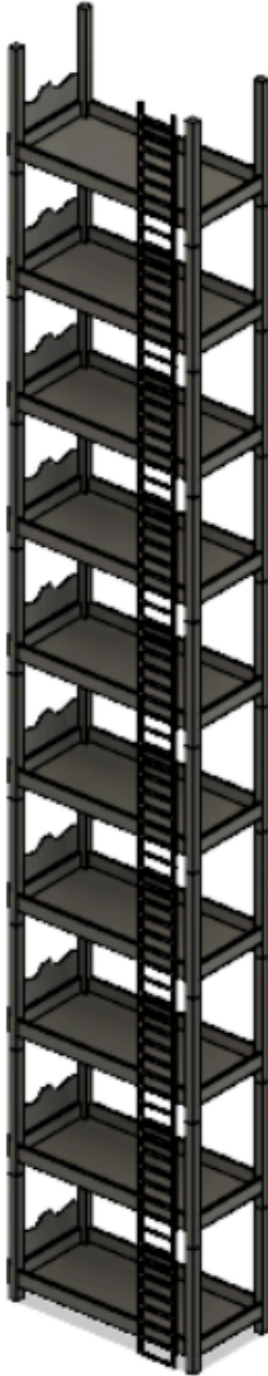

numBeds=2

numBeds=5

numBeds=10

Stool

topDiameter = 20"

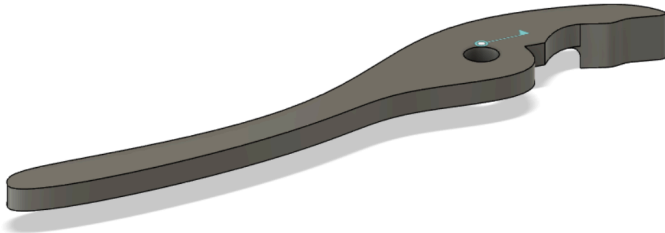

topDiameter=65"

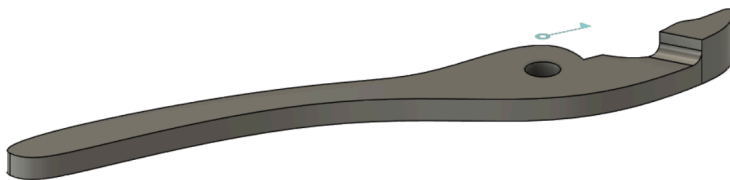

Pliers

Left side

Right side
